EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with C. Vivian on 19 October 2010.

The application has been amended as follows:

For the claims:

Please amend claims 1 and 17 as shown.

Claim 1: A combination through-wall masonry flashing / drainage device comprising a flashing membrane, the flashing membrane having a first side and a second side opposite the first side, a reinforcing cloth adhered to the flashing membrane first side, and a wicking cloth adhered to the flashing membrane second side, whereby when installed between an inner wall and outer wall with the wicking cloth facing up, water between the inner wall and outer wall is drawn through a mortar joint at the

Art Unit: 3635

base of the outer wall to the outside of the outer wall by the wicking action of the wicking cloth without the need for vents.

Claim 17: A combination through-wall masonry flashing / drainage device comprising a flashing membrane, the flashing membrane having a first side and a second side opposite the first side, a first reinforcing cloth adhered to the flashing membrane first side, a second reinforcing cloth adhered to the flashing membrane second side, and a wicking cloth adhered to the second reinforcing cloth, wherein the wicking cloth material is selected from the group consisting of polyester, polypropylene, polypropylene nylon, and polyethylene, whereby when installed between an inner wall and outer wall with the wicking cloth facing up, water between the inner wall and outer wall is drawn through a mortar joint at the base of the outer wall to the outside of the outer wall by the wicking action of the wicking cloth without the need for vents.

The following is an examiner's statement of reasons for allowance: The prior art of record, in particular Cohen and Rizzo, does not meet the functional limitation that water is transported via the wicking action of the wicking cloth. While both Cohen and Rizzo have wicking cloth material (e.g., Rizzo:

Art Unit: 3635

24), the cloth is impregnated with a waterproofing material that would prevent wicking of water.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

With the above amendments, claims 1-10 and 17-27 are allowed.

Claims 11-16 are cancelled.
